SALVIA LIFETEC

Anaesthesia

We design, develop and produce complete anaesthesia workstations, “Ventilator Kits” which could be easily installed in your anaesthesia workstation as well as certain key-components especially designed for your requirements.

Ventilation

We are currently producing a range of ventilators for different fields of application for national and international customers.

For example:

nCPAP-System for Neonates:

Features:

- Automatic safety management
- Automatic setting for alarm limits

Critical Care/Intensive Care Ventilator:

Features:

- Individual ventilation strategies
- Compact size combined with highest performance
- Intuitive operation

Aerosol Therapy (Inhalation)

In 1985 Salvia produced the first inhalation device. Today Salvia Lifetec is one of the world's leading manufacturers for high-end inhalation devices.

Here are two examples:

Alpha 101/200 Series:

Features:

- IPPB (Intermittent Positive Pressure Breathing)
- Maintenance free compressor or air pressure/ oxygen are supplied via external sources

Alveola P4:

Features:

- Intrapulmonary percussion therapy
- Secretolysis
- For hospital, surgery and home use
